

## Photos and Videos of School Events

- There are many special occasions at school where parents and staff members may want to photograph or video the children. These photos and videos can capture very some very special memories. Whilst they are wonderful to have, it is very important to understand that current privacy legislation puts clear limits on how these can be shared.
- **Parents must not share any photos or videos, taken at a school event, which depicts children other than their own on any form of social media (Facebook, Instagram, Twitter etc.)**
- Teachers may opt to ask our ICT department to set up a closed Google Drive File so that they can share photos or videos of school events with parents of their class. Access to the file will be by invitation only and those with access may only view the photos or videos (they will not be available for downloading).
- The school may, from time to time, post photos or videos of school events on the school website. Where a parent has indicated that they do not give permission for their child to be depicted on the school website, the school will endeavour to ensure the child's image is not used.
